

Join CANS users from across Idaho to learn how to use the CANS more efficiently and effectively.

CANS Collaboratives are part of the Idaho Transformational Collaborative Outcomes Management (TCOM) Institute. TCOM is about using the CANS effectively in clinical practice and decision making.

The Division of Behavioral Health (DBH) invites you to participate in our regional and statewide CANS Collaboratives. The CANS Collaboratives are for all CANS users to learn about local trends, ask questions, and share experiences.

To learn more and register please visit the [Idaho TCOM Institute](https://www.idahotcominstitute.com) website.
