

PROVIDER ALERT

Dec. 1, 2022

Alert Summary: This alert lets providers know that Optum Conference sessions are now available in Relias and details how to locate them for CEU credit.

Dear Provider,

Thank you again to everyone who participated in the second Optum Idaho Conference! When we asked attendees, “How likely are you to recommend the Optum Conference to a friend or colleague?” we received an average score of 9.2 compared to 8.7 last year, on a scale of 1-10 with 10 being extremely likely. We’re thrilled the content was so meaningful and want to make sure others know how to access the information.

The recorded session(s) for those approved to post are now in Relias. If you were unable to join a particular session and would like to obtain Continuing Education Unit (CEU) credit, please log into Relias to watch the recording(s), which have corresponding exams. Alternatively, if you prefer to view a conference session without obtaining CEU credit, you may go to www.optumidahoconference.com and watch any presentations that are of interest. Content will be available until next October. Be sure to register and create a password if you are accessing material on the conference website.
